OK - I have an email out to the head of our engineering division and I'll let you know what he says. I have also asked if we have plans for that parking lot in the immediate future and although that parking lot is currently available it would be a better option if the buses were in an enclosed structure.....

Augie,

An electrician to see if a permanent electric charging station would be feasible at that site.

Hi Lorena,

It's nice that you had a meeting with our environmental team. As far as the location where the Trolleys are parked, we would most likely use this location in the future and I'll ask to see if we have an anticipated use for that site. What type of "technical" expertise do you need - our engineering folks may be able to help? Please include me in any future meeting with our staff.....

Thanks,

Augie

Subject: Trolley Grant Supporting Materials and Question About Trolley Parking

Tim, Carter and Jacob,

Here is the preliminary cost breakdown for trolley operations. I've also include the map of our current boundaries.

Arley and Augie - Please feel free to change some of the assumptions.

Arley and Augie - In my meeting with the Environmental Management Division yesterday, we wanted to know if the current location where the trolleys are parked will be the permanent location. Of great importance is the fact that the grant will include the installation of an electric charging station so we need to have someone technical also provide their input.

The grant is due next month so we will need this information ASAP.

Thank you!

Best regards,

Lorena Parker
